BIOGRAPHY

Eating Pebble is Mattias Söderström, Benjamin Gustafsson, Fredrik Reinius and Henrik Bejmar performing an intense indie rock'n'roll show.

They produce and perform original material only.

They early decided that thier goal was to play live as much as possible to become a great live act. Eating Pebble has always worked hard writing strong hit songs, improving their show and communicating a solid message. The entire package is tight and carefully designed to entertain and move the audience.

Eating Pebble is the sound of modern indie rock'n'roll. The performance is an energetic pop show with influences from The Beatles and The Libertines as well as the old Motown classics.

QUALIFICATIONS

Through the years Eating Pebble has been part of a lot of different projects such as movies, radio shows, tv shows and competitions. They have been supporting both major- and indie bands.
